

UBUNYE Suite of Products
**Transforming
Business
Workflow**

***Redefine
Business
Workflow***

Business workflow redefined.

For over a decade **ScannerVision™** has been the workhorse of Small and Medium-sized Enterprises' document **'Capture, Process and Store'** needs. **aivika Capture Pro** and **aivika Mobile** have broadened the **'Capture'** aspect by providing a rich capture experience on desktop and mobile devices.

With the addition of **DocVolante** to the family, we now offer you the ability to **'Store'**, and importantly, **'Retrieve'**, your documents in our own Document Management System that punches well above its weight.

UBUNYE's suite of products now provides a great starting point for any business looking for the full **'Capture, Process, Store and Manage'** solution for all paper and digital documents.

Why **UBUNYE** suite of products?

Redefine Efficiency

Automate document processing saves effort and time, enabling you to concentrate on high value tasks.

Redefine Productivity

Eliminate repetitive daily tasks, reduce and recover the time lost to manual and mundane tasks.

Redefine Automation

Eliminate manual processes streamline your business processes to scale your business faster.

Redefine Collaboration

Empower employees to process and interact with documents from anywhere, anytime!

Redefine Consistency

Business-critical documents and information is collected and structured in an efficient manner for easy retrieval.

Redefine Connectivity

Seamless information flow within your organization, promoting connectivity throughout your business units.

Redefine Profitability

Reduce costs and enhance profitability. By way of Digitizing, you are implementing efficiency into your business that can prove to be a fundamental transformation.

End-to-end solution for your document life-cycle.

The business landscape has changed tremendously, and with it comes new challenges demanding businesses to optimise their operations. Scalable business process automation is what every organisation need to enhance **efficiency, productivity, and collaboration** by standardising business processes to remove operation silos, **lowering costs and improving profitability.**

There is a spectrum of ways to automate business processes, and there is no one-size-fits-all approach. We believe that automating business processes should start with document processing automation as it is the most crucial data in any organisation, and the prerequisite of business automation is data. **Capture, Process, Store and Manage** is our approach to handling document process automation throughout the document's lifecycle.

Start your business process automation with us as your stepping-stone into the world of digital transformation, or enhance your business process automation for cohesive information flow within your organisation and promote connectivity throughout your business units.

scannervision™

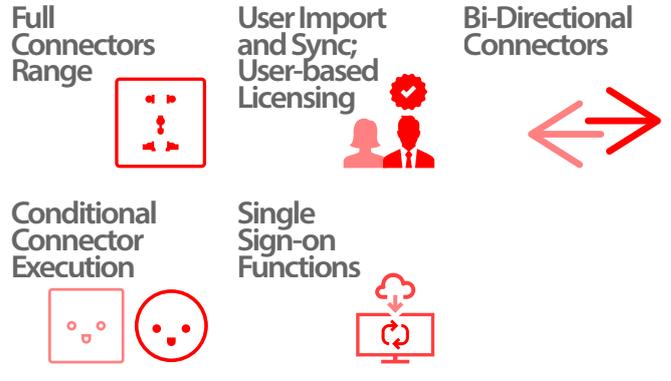

Award-Winning advanced document capture middleware solution that transform your existing office assets into the energy in streamlining your document workflows and business process management tasks.

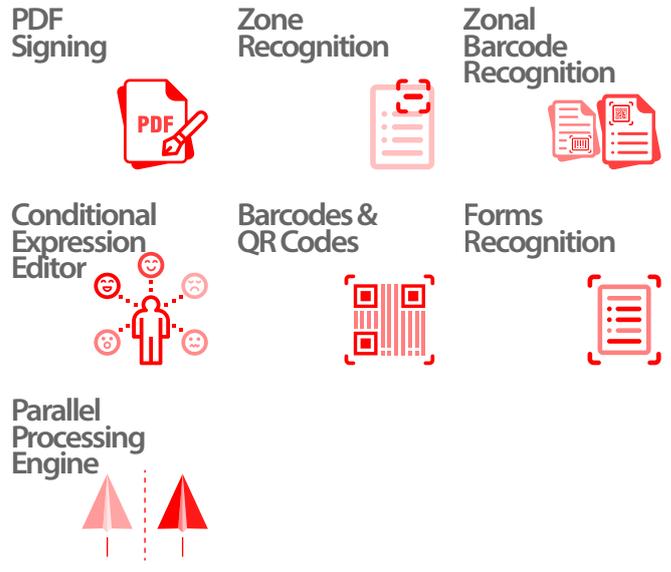

Granted the **Buyers Lab (BLI) 2022 Pick Award**, **ScannerVision™** is an advanced document capture middleware solution which is easy, affordable, and secure to implement streamlined document workflows and business process management tasks. And, with the recent launch of the **efflux** OCR Engine desktop client, it provides a seamless document processing engine with manual OCR capability in different languages, converting documents to Word, PDF, searchable PDF, etc., and many more.

ScannerVision™ extensive features:

Capture & Store

Process

Capture

Process

Store

aivika captures, processes and stores scanned documents as well as documents generated by other applications. In combination with **ScannerVision™**, **aivika** offers a number of unique and advanced features to help you create the workflow you require with minimum time and effort.

aivika comes with an extension of mobile capture solution. The **aivika Mobile Client** offers users an advanced, user-friendly document capture solution that enables users to scan, digitize, route, store and optimize their business-critical information.

State-of-the-art technology, created with the same philosophy of manageability, reliability, and flexibility, but above all simplicity.

- Support Various Languages & Operating Systems
- Document Image Pre-Processing
- Accessible with your tables & smartphones

Store

Manage

DocVolante is a Document Management System that centrally captures, indexes, stores and retrieve electronic documents such as PDFs, Microsoft Word files, and digital images of paper-based content to optimize your business processes.

Business critical documents such as contracts, letters or invoices over time can prove to be tedious as it often exists in volumes, takes up storage space and searching of relevant data can be extremely time consuming for employees.

DocVolante specifically helps organizations to be cost friendly, eliminates mundane document processes, and fastens business processes by streamlining your document workflow.

It enhances collaboration, has robust search, and retrieve functions, allows you to have version control, and is the perfect solution if you require an audit trail for your document journey.

DocVolante advanced features

Store & Manage

Document automation saves effort and time, enabling you to concentrate more on pressing business matters and work.

- Improved Collaboration
- Simplified User Experience
- Personalized Model Manager
- Robust Search & Retrieve
- Consistent Document Versioning
- Credible Audit Trail
- LDAP/AD Support
- DocVolante Connector

Automate & digitize your business processes

The benefits within a corporate to automate and digitize their processes are excellent. The move towards digital transformation is needed in order to stay ahead of the game. Hence, our key focus is continued effort to implement and tailor products to enhance processes and drive automation in your organisation.
